

Building Efficient New Homes

**Green building can
increase comfort
and save money.**

About Energy Efficient New Homes

While Washington energy code is already quite stringent, some home builders choose to participate in the Clark Public Utilities' New Homes Performance program which incentivizes builders to build homes that exceed existing state energy codes.

- Homes that go above and beyond state codes offer:
 - Lower energy costs
 - Increased comfort
 - Improved indoor air quality
- Homes that qualify for a Clark Public Utilities incentive will have been verified energy efficient by a licensed third party.

Call a Clark Public Utilities energy counselor during business hours at 360-992-3355 with questions or visit the Better Built NW website to learn more: BetterBuiltNW.com.

Builder incentives are available for both electric and gas heated homes.
