

Ductless Heat Pump

Efficient zonal heating and cooling for comfort and savings.

About Ductless Heat Pumps

Ductless heat pumps are one of the most efficient heating systems available and also provide efficient cooling.

- Save energy and money while making your home more comfortable with a ductless heat pump.
- Ductless heat pumps are two to three times more efficient than electric wall heaters or baseboard heaters.
- To be eligible for incentives, work must be completed by contractors participating in the utility's heat pump contractor network available online.

Call a Clark Public Utilities energy counselor during business hours at 360-992-3355 with questions or to learn more.

Rebates and low-interest financing are available for homes heated with electric wall heaters, baseboards, radiant heat or an electric furnace.
