About Utility Financing

Clark Public Utilities offers competitive loan terms for qualified residential customers with electric heat who own their home.

- Loans are available for a range of energy efficiency upgrades, including: heat pump installations, weatherization improvements and the installation of solar energy systems.
- Eligibility is based on credit scores and home equity.
- To be eligible for financing, work must be completed by contractors participating in the utility's contractor network available online.

To learn more about the Clark Public Utilities loan program speak to one of our team members by calling 360-992-3355.

Apply for a loan online by visiting clarkpublicutilities.com. Processing and home lien fees apply and a monthly payment is required.
