RACE FOR WARMTH JUST ONE MONTH AWAY

The eighth-annual Race for Warmth is coming up quick, so grab your favorite running shoes, a pair of gloves and get ready to hit the pavement for a good cause.

This year the walk/run benefiting Operation Warm Heart will again be held virtually and we're inviting you to

come together with us, while staying safely apart.

Because participants will race routes of their choice this year, the race window is extended to a full three days, Jan. 28-30. Racers can choose to follow one of many 5K or 10K route options available at RaceforWarmth.com, make their own route, or even hit the treadmill.

The Race for Warmth is the largest fundraiser of the year for Operation Warm Heart — the utility's donation-supported program that helps families in financial crisis pay home heating bills. Every dollar of your \$30 registration fee goes directly to helping local families. For just \$5 more, you can register your favorite pet to join you and receive a race bandana. In addition to a long-sleeve race shirt, registrants receive a bib number, medal and goodie bag with gifts from our generous local business partners.

Sign up today or make a tax deductible donation to Operation Warm Heart at RaceforWarmth.com.

UTILITY GIFT CERTIFICATES ARE A WARM AND COZY HOLIDAY SURPRISE

There's always at least one person on the holiday gift list who's nearly impossible to shop for. Fortunately, there's a gift that's guaranteed to deliver light and warmth—a Clark Public Utilities gift certificate.

Purchasing one is easy, simply call our customer service team, anytime, and we'll have it taken care of in just a few minutes. Offices are not currently open for in-person transactions, but customer service is available 24 hours a day, seven days a week at 360-992-3000.

Contributions can also be made directly to your loved one's utility account. In that case, you're welcome to give any amount you like, but account balances are kept confidential.

LIGHT LINES

USE SPACE HEATERS SAFELY

Space heaters are great for chasing away chills on a frosty winter day, but never mistake comfort for safety when using them. The soothing warmth space heaters provide can also be dangerous.

Practice the 3-foot rule and keep your space heater at least 3 feet away from any flammable objects such as paper, drapes, dusty surfaces or bedding.

Space heaters should only be used on the floor — never on a shelf, stool or bed. Never place them on a carpet or rug, hard and flat surfaces are ideal.

Never use space heaters with an extension cord and remember to shut it off before leaving the room or going to bed. It could overheat, blow a fuse or even cause a fire if left unattended.

REPORT POWER OUTAGES AND RECEIVE UPDATES

Clark Public Utilities works year round to prevent outages before they happen. But in stormy weather, even the most robust system can be damaged and require repair. If you lose power at your home or in part of your neighborhood, report it right away using PowerLine or the reporting tool at ClarkPublicUtilities.com.

Each report helps crews identify the specific location and cause of the problem; the faster the fault is found, the sooner service can be restored.

PowerLine is an automated phone reporting line that is fast and easy to use — just call 360-992-8000 or report online by clicking “report an outage” on the utility website homepage.

Either tool will also provide updates on current outages in the system and the online outage map can show outage locations countywide.

If your phone number has changed, let us know! PowerLine associates customer phone numbers with the account address when a report is made. If your number is outdated, it might not be matched to the correct address. To update, add the new number on your payment stub, email it, fill out our online form, visit MyAccount or call us at 360-992-3000.

To receive outage alerts via text, call or email, sign up for notifications in MyAccount anytime.

FUEL MIX

The 2021 Clark Public Utilities Fuel Mix

Hydro	51.27%
Natural Gas	29.87%
Nuclear	6.56%
