

POLLINATOR GARDEN - PLANT PALETTE

PROPOSED GARDEN LIST:

The plan outlines the goals of a pollinator garden for the front of the CPU Operations Center

- **Enhance our landscaping to provide resources for native pollinators.** Add a variety of native trees, shrubs and perennials to attract a diverse set of species.
- **Supplement native plants.** Utilize additional cultivars that extend the bloom time and are beneficial nectar plants for pollinators. Do not include any plants that are invasive, uses runners, has prolific seed dispersal or other concerns for leaving the garden
- **Low maintenance.** Create a layout that creates low maintenance for overall care of the garden, ease of weeding and minimal pruning. Maximize percent coverage of plant materials throughout the garden (i.e. don't leave open mulch areas)
- **Create a garden aesthetic that is attractive.** Utilize principles of garden design for structure, textures and layout that creates an appealing look for a commercial office property, comparable to an urban / suburban garden theme. Create beauty views from the office windows, a pleasant place to walk and a relaxing place to enjoy a few minutes outdoors.
