

Residential HPWH Qualified Products List

for

Advanced Water Heating Specification Version 8.1

A Specification for Residential, Commercial/Multifamily, and Industrial Water Heaters and Heating Systems

Updated: 4/15/25

Products on this list have been qualified to the Residential section of the [Advanced Water Heating Specification \(AWHS\)](#).

Model Number

Asterisks in listed model numbers may take the place of any letter or number in specific model numbers.

Entries in the *Model Number* column that include model numbers of more than one piece of equipment indicate that the qualification applies to the combination of all listed pieces (e.g. a split-system water heater composed of a specific heat pump unit and a specific storage tank).

Storage Volume

Nominal water storage capacity, in gallons.

Indoor Rating

Tier column indicates the product's tier rating as an indoor heat pump product (either as an integrated water heater or the heat pump unit of a split system installed in an indoor space).

CCE column indicates the product's Cool Climate Efficiency.

Outdoor Rating

Tier column indicates the product's tier rating as an outdoor heat pump product. *SCOP* column indicates the product's Seasonal Coefficient of Performance.

Depending on product design and certifications, a product may have both *Indoor* and *Outdoor* ratings.

Configuration

Indicates whether product is an *Integrated* (all components contained in a single piece of equipment) or *Split-System* (components separated into two or more pieces of equipment, installed in separate locations) water heater.

Flex Load Connectivity Endorsement

ECOPORT

Products marked with the "EP" icon are EcoPort^{CM}-certified and meet the current flex load connectivity requirements for tier 3 and higher products.

AHRI 1430

Products marked *AHRI 1430* are certified to that standard and meet the current flex load connectivity requirements for tier 3 and higher products.

Self Certified

Products marked SC were self certified by the manufacturer to meet flex load connectivity requirements in effect at the time of qualification. These products might not meet current requirements.

Plug-In Endorsement

Products marked with the receptacle icon meet the AWHS definition of a plug-in water heater. They can be powered by a standard outlet on a 15-Amp circuit shared with other uses.

Qualified

Date indicates when the product was most recently qualified to AWHS.

Version indicates version of AWHS that applied to the qualification.
