CALCULATE YOUR HOME ENERGY SAVINGS

Understanding your home energy use is the first step to cutting out energy waste and lowering your monthly utility bill. The free home energy calculators on our website are powerful tools to take a closer look at your home's energy consumption and discover ways you may be able to save. They're quick and easy. In just a few minutes, you'll see where your energy dollars are going and find tips for tightening up without sacrificing convenience or comfort.

Additional home energy calculators are available for specific considerations like comparing heating options, programmable thermostats, appliances and lighting; as well as calculators for solar energy and electric vehicle investments to help with decision-making.

To learn more, visit clarkpublicutilities.com or log in to MyAccount for more personalized results.

THIS WINTER SAVE ENERGY & LIVE COMFORTABLY

Many of our energy efficiency rebates are higher than ever. Invest in the upgrades that'll help your electrically heated home use less energy, help you live more comfortably and reduce your energy expenses.

LIGHT LINES

CAREFUL WITH CORDS AND DECORATIONS

Be careful where and how you use extension cords around the holidays. In addition to being a tripping hazard, damaged cords can cause a shock or a fire. Make sure cords aren't damaged and are the right size for the job. Don't run them behind furniture, under rugs, through doorways or secure them with staples or nails.

When connecting cords outside, make sure they are marked for outdoor use and in an appropriate outlet.

WORKING AROUND THE CLOCK TO
PROVIDE THE SERVICE YOU EXPECT

BILL ASSISTANCE HERE
WHEN YOU NEED IT

As Clark County grows, Clark Public Utilities is hard at work ensuring customers have the energy and water service needed to power homes and businesses, today and in decades to come. As a nonprofit, public

utility owned by customers, we’re committed to keeping the lights on at the lowest cost possible, while investing in a robust and resilient system for the future. It’s a balance between system maintenance, outage response and infrastructure improvements.

Our field employees, equipment operators and line workers spend years learning skilled trades, and are ready to respond to outages or emergencies morning or night, rain or shine. The experts who develop, design and plan the energy supply and transmission systems for tomorrow, work today while looking 20 years ahead. Alongside are hundreds of employees with unique skill sets and a variety of experience levels who are committed to serving customers as part of the utility team.

Interested in joining us? There could be a place for you at Clark Public Utilities, whether you’re just starting out or well-into a specialized career path. To find out more, visit clarkpublicutilities.com/careers.

If paying your monthly utility bill is a challenge, call us right away. Customer service representatives are available 24 hours a day, seven days a week, and will work with each customer individually to set payment arrangements or discuss assistance options.

Clark Public Utilities offers a variety of payment assistance programs, flexible payment arrangements and tools to make utility bills predictable and more manageable for customers in all life stages and living situations. Income requirements and eligibility criteria vary between programs, and circumstances in households also change, so customers who not have qualified in the past should call again.
